

Construction Loadalls

531-70/535-95/533-105/535-125/535-140/540-140/540-170/541-70/550-80

Gross power: 55kW/75hp – 93kW/125hp, Lift capacity: 3100kg – 4999kg, Lift height: 7m – 16.7m

Why you
should
choose a new
JCB T4i/III B Loadall...

NEW INSTRUMENTS WITH HI-RES TFT SCREEN

NEW UP TO 15% MORE TORQUE[†]

NEW 7-SPEED VENTILATION FAN

NEW JCB ECOMAX T4i/IIIIB ENGINE
NO DPF REQUIRED

NEW IMPROVED, UPWARD AIR EXPULSION

NEW UP TO 7% FUEL EFFICIENCY SAVINGS

NEW ULTRA EFFICIENT VARI-SPEED COOLING FAN[†]

NEW LOW PROFILE ENGINE BONNET

NEW EFFICIENT BRAKES FOR 2% FUEL SAVING[†]

NEW 55KW ENGINE OPTION[†]

[†] Model dependent

ULTIMATE PERFORMANCE, **ULTIMATE PRODUCTIVITY**

THE NEW CONSTRUCTION LOADALL RANGE IS DESIGNED TO MAKE THE MOST EFFICIENT USE OF YOUR TIME AND MONEY. THAT MEANS YOU CAN EXPECT SUPERLATIVE PERFORMANCE, VERSATILITY, VISIBILITY, CYCLE TIMES AND ERGONOMICS. CLASS-LEADING PRODUCTIVITY IS, THEREFORE, A GIVEN.

A productive machine

- 1 A JCB Construction Loadall is extremely manoeuvrable making it easy to operate in confined spaces; the compact wheelbase and large steering lock angles save you valuable travel time on site.
- 2 Loadalls come with 4WD as standard (optional 2WD can also be selected to minimise tyre wear and fuel use when roading), helping you maintain plenty of traction and performance in soft, muddy areas. A limited slip differential in the front axle is an option too.

Productive lifting and hydraulics

- 3 JCB's optional Smoothride System (SRS)* cushions shocks from the boom, improving load retention and increasing operator comfort (and therefore productivity) when travelling at speed on the road or on uneven fields.

*Model dependant

JCB's new efficient EcoMAX T4i engine produces its power and torque at low engine speeds for great responsiveness, and our wide range of Loadall models means you can find the perfect machine for your requirements.

With a variable geometry turbo for excellent performance at low revs, the JCB EcoMAX T4i engine can provide greater fuel efficiency.*

- 4 The JCB quickhitch system makes attachment-changing quick and easy.
- 5 For the most efficient lifting, extending and pushing – our class-leading hydraulics will give you the fastest cycle times.

On our three and four stage boom machines we fit stabilisers for increased stability and lift performance (not 535-95).

Productive controls

6 A Construction Loadall has three selectable steer modes. There's two wheel steer, which is ideal for travelling at high speed on the road; four-wheel steer for working in tight spaces; and crab steer for manoeuvring close to walls and buildings.

An optional reversing fan can be used to clear dust and debris from the cooling system to maintain performance.

7 A selectable transmission dump* on the foot brake provides superb multi-functioning and increased power during loading or rehandling. Braking itself is smooth and responsive, with all-wheel servo assistance.

8 For added versatility, all JCB Loadalls are fitted as standard with a single boom auxiliary feature which can power a wide range of attachments.

*Model dependant

A SOUND INVESTMENT

A JCB CONSTRUCTION LOADALL ISN'T JUST EFFICIENT TO USE – IT'S HUGEY EFFICIENT TO OWN AND OPERATE TOO. WE'VE DESIGNED THESE MACHINES TO GIVE YOU THE MAXIMUM POSSIBLE RETURN ON YOUR INVESTMENT, WITH GREAT FUEL EFFICIENCY, UNPARALLELED RESALE VALUE AND LOW RUNNING COSTS ALL PART OF THE PACKAGE.

EcoMAX efficiency

1 The 81kW and 93kW EcoMAX engines are fitted with a variable speed cooling fan that automatically reacts to ambient temperature, adjusting fan speed for maximum economy and minimum noise.

The new 55kW high-torque engine provides productivity and maximum efficiency.

2 Because EcoMAX doesn't use exhaust after-treatment, it doesn't need costly heat-resistant lube oils or AdBlue; in turn, you save on servicing costs.

Efficient Design T4i loadalls use up to 7% less fuel than our Tier 3 models.

EcoMAX can be adapted to run on lower-grade fuels, making our Loadalls resalable across different territories, with a corresponding boost to residuals.

We've reduced the Powershift oil level for a 1% energy boost.

By producing high levels of power and torque even at engine speeds as low as 1300-1400rpm, EcoMAX can provide fuel-efficient matching of transmission and hydraulics.

Further efficiency

3 A JCB Construction Loadall is a great asset in so many respects, not least financially – huge global demand, plus legendary productivity, plus superb build quality equals maximum resale value.

4 High back-off brakes on 531-70, 541-70, 535-95 and 533-105 reduce viscous drag during roading and rehandling, which improves fuel economy by up to 2%.

JCB's Loadall security system is Thatcham-approved (depending on territory), which means you could benefit from lower insurance premiums.

THE STRONGEST CONTENDER

IN ORDER TO BE TRULY EFFICIENT, OUR CONSTRUCTION LOADALLS ARE DESIGNED TO PROVIDE YOU WITH MAXIMUM UPTIME. TO DO THAT, WE BUILD OUR MACHINES TO BE AS TOUGH AS POSSIBLE, USING TOP QUALITY COMPONENTS AND INNOVATIVE MANUFACTURING PROCESSES. THIS, IN TURN, ENSURES MAXIMUM SERVICE LIFE.

Tough boom design

- 1 For ultimate strength and durability, we've built in large boom overlaps of more than 1.0m on all of our machines.
- 2 Hoses are routed through the boom for maximum protection.

Built-in protection

- 3 Bonnets on Construction Loadalls are protected from damage by being side-mounted on the chassis and recessed.
- 4 Our Construction Loadalls have fold-up rear lights that can be kept clear and well protected from on-site damage.
- 5 Opt for front and top screen roof guards for added protection from falling objects.

- 6 Heavy-duty axle feet help a Construction Loadall to absorb the stresses generated during material rehandling applications.
- To protect our Construction Loadalls from corrosion over the long term, we dip the cab in electrophoretic alloy before painting it.

We've fitted a tough inverted U-shaped boom pressing with fully welded closing plates. For extra strength, we've reduced the number of joints and stress points across our integrated boom nose and one-piece closing plate.

The boom on a Construction Loadall is mounted low in the chassis, providing an extremely rigid structure and maximum over-the-shoulder visibility.

Centralised lift and displacement rams ensure load stresses are evenly distributed.

Durable components

7 The new Construction Loadall range's stringent testing programme has included prolonged high stress loading of the chassis, boom and other key components, as well as cold climate testing and repeated transmission use over thousands of cycles.

8 The lift, tilt and extension rams are held in place by keyhole castings for even greater structural integrity.

9 To prove how good our EcoMAX engines are, we've tested them for 110,000 hours in 70 different machines across the toughest applications and environments.

10 The one-piece fully welded chassis maximises strength and minimises weight.

11 At JCB, we make our own hydraulic cylinders, cabs, axles, transmissions and engines – all designed to work in perfect harmony for optimum reliability.

A SLICK OPERATION

FOR A MACHINE TO PROVIDE MAXIMUM EFFICIENCY, IT NEEDS TO BE INTUITIVE AND COMFORTABLE TO OPERATE. WITH THAT IN MIND, WE'VE DESIGNED THE NEW CONSTRUCTION LOADALL RANGE TO PROVIDE THE MOST ERGONOMIC OPERATOR ENVIRONMENT POSSIBLE. SO YOU GET THE MOST OUT OF YOUR MACHINE AND YOUR OPERATOR.

Ergonomic controls

- 1 Simple to use twin manual levers and one manual auxiliary with optional single lever joystick.
- 2 Backlit switches are crystal clear, even in the dark.
- 3 New instruments and a hi-res TFT screen form an intuitive automotive-style layout.
- 4 To create the perfect driving position, opt for the easily adjustable tilting telescopic steering column.

Comfort and convenience

6 The 7-speed fan heater creates the most comfortable, productive operator environment.

6 The optional cab, front, rear and boom work lights provide excellent visibility.

7 Visibility on a Construction Loadall is excellent, courtesy of direct glazing large roof screen and low profile bonnet.

In addition we have angled our roof bars to ensure maximum visibility when placing at height.

8 On our 550-80 and 540-170 Construction Loadalls we have fitted a servo joystick for fast and precise control (optional on a 535-140/535-125).

9 The exterior top door slam latch is new – you can now close the upper door from outside and hold the door ajar.

On bright days, a Construction Loadall's standard-fit tinted cab glass will reflect 30% of the sun's energy for enhanced operator comfort.

The new-look Construction Loadall exterior isn't purely cosmetic; the cooling fan airflow is now angled upwards, reducing dust build-up.

SAFE AND SECURE

A JCB CONSTRUCTION LOADALL CAN SAVE MORE THAN JUST TIME AND MONEY – IT CAN SAVE ITSELF AND ITS OPERATOR FROM POTENTIALLY DANGEROUS SITUATIONS. WE EQUIP OUR LOADALLS WITH STRINGENT SAFETY MEASURES TO PROTECT FROM ACCIDENTS, AS WELL AS EFFECTIVE SECURITY TECHNOLOGY TO GUARD AGAINST THEFT.

Every Construction Loadall has a security system that's Thatcham-approved (depending on territory). This comprises a Cesar Datatag (on UK vehicles), a JCB Livelink telematics vehicle tracker, and an immobiliser.

JCB Adaptive Load Control automatically controls hydraulic operation to help maintain the longitudinal stability of your Construction Loadall.

The operator presence switch on Construction Loadalls disables drive when an operator leaves their seat; this prevents accidental operation.

1 For quick, easy and safe access, JCB Construction Loadalls have a three-point access and two cab steps.

2 Hose burst check valves on the rams prevent collapse if a hose fails.

3 A JCB Construction Loadall has excellent rearward and off-side visibility, courtesy of a low boom and bonnet profile and low boom pivot.

4 A JCB Loadall comes equipped with a full set of side and rear view mirrors for all round visibility and safety compliance.

5 For extra safety, a reverse alarm is standard-fit on all Construction Loadalls.

6 JCB factory-fit immobilisers, can either be activated by a unique key or optional push button PIN system, that automatically arm themselves after a certain period following engine shutdown.

LESS SERVICING, MORE SERVICE

NATURALLY, YOU WANT YOUR CONSTRUCTION LOADALL TO SPEND AS MUCH TIME AS POSSIBLE AT WORK, NOT BEING WORKED ON. WHICH IS WHY JCB LOADALLS HAVE LONG SERVICE INTERVALS; AND, WHEN MAINTENANCE DOES NEED TO BE CARRIED OUT, YOU'LL FIND OUR MACHINES ARE EASY AND QUICK TO SERVICE.

1 Most Tier 4i engines use a Diesel Particulate Filter (DPF). EcoMAX doesn't. That means no worrying about loss of productivity during the regeneration process and potential extra expense in replacing DPF's. All daily checks, greasing and serviceable components can be accessed at ground level.

2 You can access a Construction Loadall's battery easily (and without specialist tools) via a lockable cover that's opened with the ignition key.

3 The diesel tank is also easy to get to, and can be filled from ground level. For protection from dirty fuel, there's an integral pre-filter in the filler neck.

4 A dry lubricant system means a Loadall's wear pads are extremely durable, with service intervals of 500 hours.

5 The filters on a Loadall (engine oil, hydraulic oil and fuel) are centrally located for fast, easy servicing.

The air filter is easily accessible, and its double-element design simplifies cleaning. The fact that we design our Construction Loadalls to be fast and easy to service, ensures we have best-in-class SAE serviceability ratings.

For fast, easy inspection of 3 sides of the engine, Construction Loadalls have a large, wide service bay, accessed by a gas-assisted bonnet.

LIVELINK, WORK SMARTER

LIVELINK IS AN INNOVATIVE SOFTWARE SYSTEM THAT LETS YOU MANAGE JCB MACHINES REMOTELY – ONLINE, BY EMAIL OR BY MOBILE PHONE. ACCESS EVERYTHING FROM MACHINE ALERTS TO HISTORY INFORMATION, WITH ALL DATA STORED AT A SECURE CENTRE.

Productivity and cost benefits

All LiveLink equipped Tier 4i Loadall machines built are now able to report fuel economy, idle time and engine load data through the LiveLink web portal, helping you reduce your fuel usage, saving you money and improving productivity. Machine location information can help improve efficiency and perhaps even reduce insurance costs.

Maintenance benefits

Manage machine maintenance easily – accurate hours monitoring and service alerts improve maintenance planning, while real-time location data helps you manage your fleet. Critical machine alerts and maintenance history records are also available.

Security benefits

LiveLink's real-time geofencing alerts tell you when machines move out of predetermined zones, and real-time curfew alerts inform you of unauthorised usage. Further benefits include real-time location information, advanced ECU matching (pairs LiveLink with the immobiliser or ECU).

VALUE ADDED

JCB'S WORLDWIDE CUSTOMER SUPPORT IS FIRST CLASS. WHATEVER YOU NEED AND WHEREVER YOU ARE, WE'LL BE AVAILABLE QUICKLY AND EFFICIENTLY TO HELP MAKE SURE YOUR MACHINERY IS PERFORMING TO ITS FULL POTENTIAL.

1

1 Our Technical Support Service provides instant access to factory expertise, day or night, while our Finance and Insurance teams are always on hand to provide fast, flexible, competitive quotes.

2 The global network of JCB Parts Centres is another model of efficiency; with 15 regional bases, we can deliver around 95% of all parts anywhere in the world within 24 hours. Our genuine JCB parts are designed to work in perfect harmony with your machine for optimum performance and productivity.

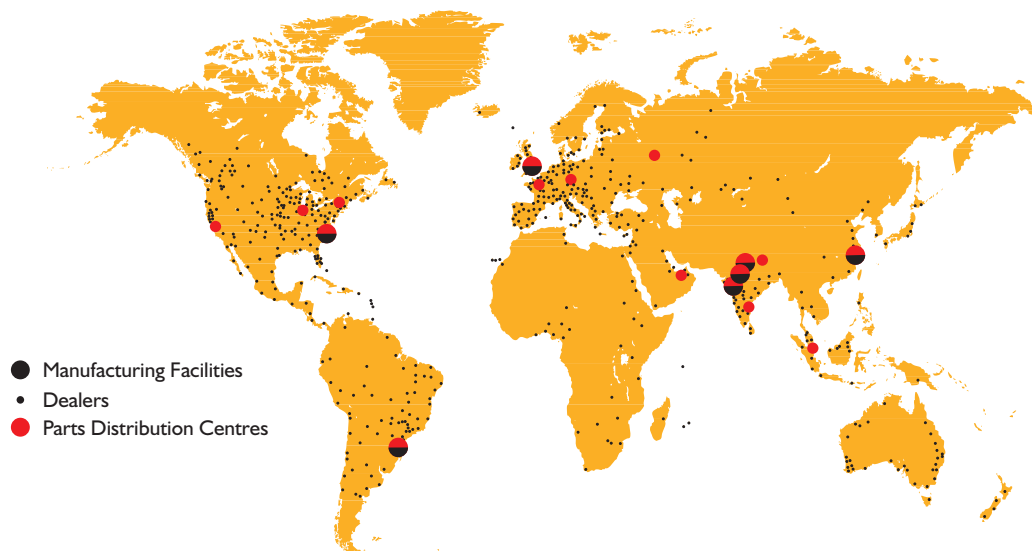

2

3 JCB Assetcare offers comprehensive extended warranties and service agreements, as well as service-only or repair and maintenance contracts. Irrespective of what you opt for, our maintenance teams around the world charge competitive labour rates, and offer non-obligation quotations as well as fast, efficient insurance repair work.
